Feedback

Nanditha Shetty

Manager

MobiGnosis

“Ranjith has good knowledge and delivery skills. His approach is in - depth oriented and has excellent crowd management skills”

Jyothish Kumar A

Data Analyst

S4Carlisle Publishing Services

“Ranjith is a skilled and Android developer, and an excellent teacher who can explain things in a simple and understandable manner. Learning Android from Ranjith sir's class was a knowledgeable experience”

Swapnil Pande

Senior Programme Manager (L&D)

Mindcrest

“I was in touch with Ranjith, and many other trainers and training consultants for engineering graduate technical orientation program. We used to be very sincere and serious with the trainees feedback on the faculty, and used to replace the trainer after due-diligence in case if the feedback was not right. Ranjith feedback from the trainees always was excellent. Along with being good in the subject matter, Ranjith engaged with trainees well, made sure to take care of their attention span, gave several exercises and coached the trainees individually. This reflected his (1) command on the subject matter and (2) passion for teaching. I will be glad to work with Ranjith any day, and in case if someone is looking to hire a technical trainer in the field of computer science, I will recommend his name. My good wishes to Ranjith for his career.”
